News from Amstralia.

By the arrival of the Red Jacket and Flory Cross at averyool we have advices from Melbourne to the 20th of annary.

From the Melbourne Argus, January 11, we extract be following intelligence.

From the Melbourne Aryas, January II, we extend the following intelligence:

The yield of gold is steady and increasing, and the mining population generally is in a prosperous cendition. The export of the presious metal for 1855 has amounted to 110 toss 8 out. 3 qm. 6 has, against 88 tone 8 cwt. 3 qm. 6 has for the previous year. The receipts by secoret and abspresents for 1864 and 1865 respectively have hem:

\*\*We have recorded at various times the progress made during last year in cultivation, and we have now the satisfaction of stating that the crops in course of being garnered exceed in quantity and quality those of any previous year. To distant readers, who are but little acquainted with our agricultural districts, a suscinct statement of a general character will better convey an idea of agricultural progress than the specific statements which reach us from those localities. It is estimated that the area of land under cultivation, this year is at least double that of any former year, and that the produce will be squal to more than the quadruple of any one of the three years preceding. The proportion of wheat to other produce has largely increased, and, although importations will be secessary, a great advance has been made towards establishing the colorny as self-sustaining in the article of bread. Contemporaneously with the extension of cultivation, fleur mills are being erected in anticipation of the harvest, and the population on the gold fields will this year draw their supplies partry from the contiguous land, instead of incurring the enormous expense of cartage from Melbourne or Gestorg. We look forward to a still turbler iscrease of cultivation this year, and already in some places the plough is hasily at work in maiden from the crown cut of their savings, and appear fully earlieded with the results of their first experiment, while market gardeners have lately settled on land purchased from the crown cut of their savings, and appear fully earlieded with the results of their first experiment, while market gardeners have this year derived a greater profit, on t

MERBOTENE, Jan. 25—We have no alteration to note in the gold market. The entri-a for shipment at the Custom Rouse to-day consisted of 1,140 cz. 6 dwts. for Sydney; 24 cs. for Liverpool; 6 cz. for Mauritius, and 2 oz. for Valparaiso.

At oz. for Liverpool; 6 cz. for Mauritius, and 2 oz. for Valparaiso.

The arrivals for the week ended yesterday include two ships from the United Kingdom and four from the United States of America. The immigration for the week has been principally from the neighboring colonies. Adelaid flour in coming to hand freely, and, with our own incoming harvest, must scon reduce the price to £25, which was the rate anticipated for the end of January by well informed dealers.

The escorts from Mount Alexander and Baliarat arrived at the gold office yesterday, at the appointed hour, and brought the following returns, viz.—Gold, 40,127 oz. 10 dwts.; cash, £75,344.

The intelligence from Nicaragua cast a damper difficult to describe upon the hopes of every friend of the Nicaraguan movement. A morbid curiosity to learn all the particulars of the engagement reported to have tale place between the small corps under the command of Major Schlessinger and a detachment of the Costa Rican army prevailed in every section of the community, and many were the fervent whales expressed in behalf of the noble cause espoused by the chiralrous Walker. The following letter which we publish, from a scurce which may be considered official and authentic, places the matter in a different point of view, and reveals the glaring exaggerations of the account. We commend it to the careful perusel of the public.

We rejeat the opinion expressed by us on the receipt of this intelligence, that little reliance must be placed in the version of political affeirs which reach us via Aspinwall. Not only is the partiality to the arms of the Central American all is strong and decided in that locality, but there are particular and personal interests at stake there, the realization and success of which depend in a great measure upon Walker's overthrow.

These who dream that the star of Nicaragua's regeneration has reached its culminating point are laboring under a delusion which at will only require a few days to dispel. The forces under the command of fen. Walker consist of the cities of the young men of this country—ardent, chivalrous and high minded—whilst many of the officers are bronze viasged veterans who have seen hard service and acquired ceichri y on many a European batter individual safety dep nds upon their courage and restrict for years the progress of American civilization. Asting under these consideration, there is no fear that they will prove recream to their duty or cower before the heats of degraded serfs. Theirs is a noble mission, and right well will they acco

await the arrival of a second Nicaraguan detachment of 500 men.

The Costa Ricans were assembled near the line, be tween 2 000 and 3,000 strong, instead of 500, (Risehood No. 2,) and perceiving Schlessioger's position, attacked him bufere he sende be reinforced; and is it to be wondered at that he reweared to San Juan with the remainder of his noble little band? The regular army of Costa Rica is near 5,000 strong, and that 500 of them should attack 400 awardens is so preprentations as assercedy to need a con-

Before Hon. Judge Betts.

Apart. 23.—The Filibusters.—Mr. A. A. Phillips presented to the District Attorney some affidavits, which satisfied him of the intention of Mr. John Creighton to return from Niearagua.

The District Attorney then said that he would not move to forfeit Mr. Creighton's reorgainances.

On applies ion of Mr. Phillips, a motion to reduce the beal of the other parties charged with an unlawful expedition to Nicaragua was set down for Saturday next.

CHARGE OF MURDER ON THE HIGH SEAS.

The United States vs. Wm. Baston alias Bashford—The prisoner in this case is indicted for the murder of James Reed, on the 18th sarch, on the high seas, on the ship Victoria, by stabbing him in the left bereast with a knife. The United States District Attorney and Mr. Joachimesen appeared for the prosecution, and Mr. Spencer for the defeace. A winess, maned Dempsey, depresed to the transaction, by which it appeared that the trunk of the prisoner had been between them and deceased. On the following day they were both in the locacastic of the vessel; Baston had his knife open, and Reed was standing over him, when on a sudden deceased cried out, "I am stabbel," and soon after diel.

The District Attorney, under the streumtances, would withdraw the charge of murder, and as there was an absence of premedication, would accept a plea of manslaughter. The Court approved of the course, and Mr. Spencer, on behalf of the prisoner, consented.

MOREY MARKET.

WEDNESDAY, April 23—6 P. M.

The stock market continues active, but prices appear to be generally decreasing. With two or three exceptions, lower rates have ruled to-day. At the first board Virginia 6's advanced % per cent; Michigan Southern, %; Chicago and Rock Islanda, %. Cumberland Coal fall off % per cent; New York Central Railroad, %; Galena and Chicago, %; Cleveland and Toledo, %. There were sales of Milwaukie and Mississippi at 83 a 83% per cent cash, and 85, buyer sixty days. New York Central, Eric, and Cleveland and Toledo were the leading stocks on the market to-day. Michigan Southern was firm at the adat 113½, and closed at 113½, per cent, with the sale of only fifty shares. There was a moderate movement to-day in Nicaragua Transit. It sold as high as 14½ per cent, buyer sixty days. Reading was very dull this morning. Two small small lots were sold at yesterday's

At the second board the market was moderately active At the second board the market was moderately active, and more buoyant. Galena and Chicago advanced & percent; Reading Railroad, %; Erie Railroad, %; Cleveland and Toledo, %. The market is in a very sound, healthy state. It is utterly impossible to get any of the leading stocks down much. Money is easy, and any amount can be raised to carry good securities. The bears are daily getting deeper and deeper into the mire, and if they do not not the state of the not get out between this and the first of June, it will be a difficult matter for them to do so with out serious losses. The bears have suffered some lately. The market has for some weeks been gradually appreciating. The appreaching summer bids fair to be a good time for the bulls, and those who have looked far enough ahead have already fortified themselves with good lines of all the leading securities. The banks must soon turn their attention more to loans on stock, in the absence of a demand from other sources, and that will give a great impetus to speculation. On the lat of June seven and a half millions of specie comes out of the Sub Treasury. Most of that large sum will go into the banks, and thus form a breader basis for an expansion.

A. H. Nicolay's regular semi weekly auction sale of stocks and bouds will take place to-morrow (Thursday), at 12% o'clock, at the Merchants' Exchange. The steamship Cambria, from Boston for Liverpool to-

cay, carried out on f.eight, \$512,000 in specie.

By the arrival of the steamship Arago at this port, from Havre, and the steamship Arabia at Halifax, from Itempool, we have advices from Europe seven days later.
The political intelligence is intrecting. Financially and commercially the advices do not vary materially from those received by the previous steamer. Consols had advanced a fraction. The money market remained unchanged. Breadstuffs were a little better and in more active deabout the gist of the news.

The Assistant Treasurer reports to day as follows:—

NEW YORK CATTLE MARKET.

WEDNESDAY, April 23, 1866.

There was an average advance of 1 1/40. per lb. on beef There was an average advance of 1,40. per lb. on beef cattle at Alierton's to-day, predicated upon a material falling off in the supply, as compared with last market day. The quality generally was fair—the offerings including some very fine beeves and some very poor—the latter rather predominating. The supply came principally from Ohio and Illinois, though the other principal stock preducing States were fairly represented. Included in the receipts were 100 bead from Baltimore, which came by propellers: they were in fair condition, notwithstanding their sea voyage. The total number on sale during the day was 1,624 head, making a total for the week of 1,741 of whith but few, if any, it was believed, would remain unsole; 87 of the above came by the Delaware and Hudson canal, and are supposed to have been indigenous to Jersey soil. In cows and calves there was no notable charge, the few received naving been sold at about previous prices. Veal calves plenty and dull, at from 5%c to 6c per lb, live weight, as in quality. Of swine, 944 were sold at previous prices.
